

Better sound with fewer speakers

360-degree sound
3 installation options
A design made to fit any space

About

Spottunes' mission is to **transform how people experience every space** with our innovative smart sound system.

Our speakers deliver the ultimate visitor experience with their unique design, featuring **360-degree sound technology** known as Omni Sound.

With Spottune, your space comes to life, offering an immersive audio experience that **captivates your customers and enhances every moment.**

SPOTTUNE IN ACTION

"Spottune gives us full control of the music and the individual volume of each speaker, making it easy to set the perfect atmosphere in our restaurant." - Peter, Restaurant owner.

An enjoyable atmosphere created by music can improve customers' mood and lead to better sales.

Can uplift employees' spirits, helping them feel more positive and productive.

Create privacy in areas where it is needed.

"Our store's audio has never sounded better, thanks to Spottune. It far surpasses our old system, and I can only recommend Spottune to others." - Sara, Store manager.

Omni Sound

This unique feature **evenly distributes sound in all directions**, delivering an immersive audio experience to every listener, regardless of their location.

The speaker's patented design ensures clear, consistent sound across up to **75 square meters**—covering more area than traditional speakers and requiring **fewer speakers** compared to alternatives.

3 installation options

Omni Track

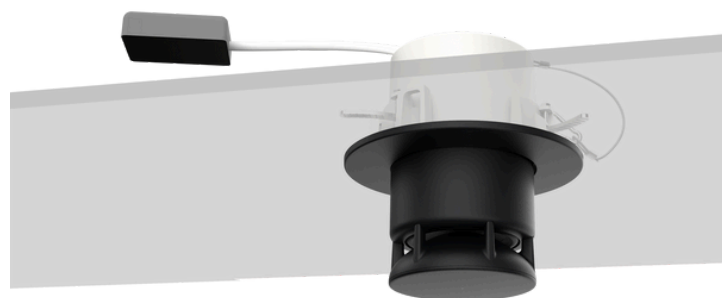

The Omni Track speaker integrates with track lighting, enabling a **Plug & Play installation**. It fits most infrastructures, **reducing installation costs and eliminating bulky cables**. Once powered, the speakers instantly connect to the Stream, ready to deliver music in minutes.

Omni Cord

The Omni Cord is designed for easy ceiling mounting. Along with delivering the same high-quality sound as the Omni Track, **its cord can be creatively used as a decorative element** to enhance any space.

Recessed

The Recessed Kit integrates seamlessly into ceilings, allowing for **discreet speaker placement**, all while delivering the same high-quality sound as the Track and Cord.

Sleek design

Spottune speakers are designed with a sleek and minimalist aesthetic that **blends seamlessly into various environments**. The speaker's design is cylindrical and rounded, giving it a modern look and allowing for 360-degree sound dispersion.

The speakers come in black, white, and grey to complement most interior designs without drawing too much attention to themselves. Additionally, Spottune speakers are **lightweight, making them easy to install in tracks or ceilings**.
